COVER LETTER

A warm hello!

I'm a techie relocating from Helsinki to Belfast by the 31st of July. I hope you might find my open CV useful for the position applied and an honest idea of who I am.

After 6 years of IT study and projects in nordic work environments and projects ranging from AWS solutions architect, Linux System Admin, Azure data engineering, python/excel/tablaeu data vizualisation to pure software development, design and solution management... I'm a bit of a mixed cat.

I'm a calm and confident guy and believe I can adapt exceptionally well into the role and and further. I'm more than willing to further develop my knowledge and skill set to fit and benefit the role. I bring my ability as a problem solver to anything in IT.

Very open minded as to where my career development takes off. Anything can be mastered and certificates can be done as I find my feet in Northern Ireland.

Lastly, I'm humble and nurturing, naturally great with all people. I value transparency and responsibility so you can expect a highly self driven peer with clear communication and I'd love to talk further about role.

Thank you & Kind regards
Simon

PROFILE

Graduate of IT, business and design with experience. I love JavaScript frameworks and good with people but I'm also passionate with design and strategy! I did my thesis on serverless multicloud solutions for software development. Major in UX, minor in cloud development. IT Management and professional software experience. Ambition to become a senior UX and or frontend lead who truly understands the client, designer and developer. 14 yrs exp with windows, 3 with Linux.

SKILLS

Figma, react, vue, typescript, tailwind, illustrator, photoshop, excel, consultation, team leadership. independent problem solving, solution mapping, all critical UX and CD disciplines + SDLC scrum, agile, kanban and version control, windows and Linux systems with bash and powershell. AWS, Azure and python familiar and of course graphic design and motion graphics. Some security and AD familiarity.
